Profile

Motivated and detail-oriented Computer Science student passionate about software development and cybersecurity. I aim to apply my technical and analytical skills to create efficient, reliable, and scalable solutions.

Education

B.Tech in Computer Science and Engineering

Adikavi Nannaya University, Rajahmundry
2023–2026 — CGPA: 7.9/10

Diploma in Computer Engineering

Aditya Polytechnic College, Surampalem
2020–2023 — Percentage: 79.5%

Secondary Education (10th)

Z.P. High School, U. Kothapalli
2020 — GPA: 9.3/10

Technical Skills

Programming: C, C++, Java, Python – solid grasp of OOP and problem-solving.

Web: HTML, CSS, JavaScript for front-end design.

Database: SQL, Firebase for structured and real-time data handling.

Tools: VS Code, Android Studio, Git.

Core Areas: Data Structures, DBMS, OS, Computer Networks.

Certifications

- **Cybersecurity and Ethical Hacking:** Learned secure system practices and ethical penetration testing.
- **Database Management Systems:** Gained knowledge of SQL queries and schema design.
- **Python Programming (Udemy):** Studied OOP, loops, and automation basics.
- **Cybersecurity with Kali Linux (APSSDC):** Practiced vulnerability assessment tools.
- **Android App Development (APSSDC):** Built apps with Firebase-based real-time data sync.

Projects

College Notes Android App

Developed an Android app allowing students to upload, browse, and manage academic notes using Firebase. Integrated login, data retrieval, and search functionality for easy access.

Ethical Keylogger – Cybersecurity Project

Created a sandboxed keylogger simulation for controlled cybersecurity research. Analyzed keylogging behavior and proposed mitigation strategies in ethical contexts.

Internships

Cybersecurity with Kali Linux – APSSDC, Remote May 2024 – June 2024

Explored cybersecurity fundamentals using Kali Linux. Wrote Python-based scripts for network scanning, vulnerability testing, and ethical hacking exercises.

Android App Development – Infosys Springboard / APSSDC, Remote April 2025 – June 2025

Developed Android apps using Java and Kotlin. Designed clean UIs, integrated Firebase authentication, and collaborated using Git for version control.

Achievements

- Created Android and cybersecurity-related academic projects recognized for innovation.
- Completed APSSDC training workshops in cybersecurity and app development.
- Actively contributed to GitHub mini-projects focusing on Python and automation.

Languages

Telugu (Native)
English (Fluent)

Declaration

I hereby declare that the above information is true and accurate to the best of my knowledge and belief.
